

TO WHOM IT MAY CONCERN

Date: 11th November 2002

Subject: Reference letter regarding Mr. Vincenzo Milanezi

Mr. Vincenzo Milanezi was accepted in June 2013 for a 5 month internship in my company, for completion of the last part of his second cycle degree (two year Master - 120 ECTS) in Civil Engineering at the University of Bologna, Italy.

He was responsible, under my supervision, for the technical development of numerical models and analysis of results of a sound reinforcement system to be installed in a 45.000 seats football stadium under construction since January 2011 to host football matches for the 2014 FIFA World Cup which will be held in Brazil. The objective of this work was to provide comments on the original sound reinforcement design, comparing the sound system supplier simulations results with independent simulation results with different software. The software used were CATT-Acoustic and DDA (Digital Directivity Analysis) from Duran Audio.

During this internship Mr. Vincenzo Milanesi has revealed not only the intellectual ability but also an enthusiasm and working capacity which will give a solid basis for a successful work in your company. He has demonstrated an excellent working organization and initiative, which give me full assurance that his work in your company will be taken to a good end.

If you need further information regarding Mr. Milanesi please do not hesitate to contact me.

Kind regards,

Octávio Inácio

(CEO and partner)

A brief note about our company:

InAcoustics is a multi-disciplinary design and consulting company in all areas of Acoustics and Vibration, founded by Octávio Inácio in 2004, base on his learning experience at the Institute of Sound & Vibration Research, University of Southampton, U.K. Currently InAcoustics works mainly with acoustical building design in the national and international market but with emphasis on Portugal and Brasil.
